Create the Next Aggie Tradition

In today’s interconnected world, international experience is essential to success in any career. Far beyond recreational travel, global study allows our scholars to gain unique insight and awareness they can’t acquire on campus. It will also bring Texas A&M greater recognition on the world stage.

Texas A&M lags behind peer institutions in global study, sending only about 2.6 percent of its student body on study, research, service or internship opportunities abroad. Most students cite financial constraint as the primary reason they are unable to participate in these programs.

Study abroad opportunities vary in length from one week to a year. By funding these scholarships, your generosity will give promising Aggies the edge they need to keep Texas and our nation strong. Because the scholarships are endowed, they will support A&M students forever.
Fund Global Study

• An individual or group can establish a global study scholarship with a gift of $25,000 that can be paid over a period of up to five years.

• Fund your scholarship with cash, securities, real estate, planned gifts and corporate matching gifts.

• Name your scholarship in memory or honor of a person, class or organization. Direct your scholarship to target a specific study abroad experience or field of study.

• Your scholarship provides a student with a one-time global study award. Every year, a new student will be named to your scholarship.

Leave a Legacy

• The global study scholarship program allows you to develop relationships with students to share ideas and dreams. You will meet your scholars and other donors at an annual on-campus celebration.

• You will receive a plaque honoring the person for whom the scholarship is named, and your gift will be recognized on a master plaque.

• New global study scholarship donors are also recognized in Spirit magazine.

For more information on the Global Study Scholarship program, contact Jody Ford ‘99, director of development for scholarship programs:

Being immersed in a different culture has been an eye-opening experience. As an architecture major I study the great works of architects past and present. Seeing the buildings up close and personal really brings them to life. Also, my field is becoming a more global profession with architecture firms working in all areas of the world. Acquiring the knowledge of how to interact with people who are different from me will help me be a better professional.
